RULING ON ENTITLEMENT¹

On February 24, 2023, Debra Inman filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that she suffered a shoulder injury related to vaccine administration (“SIRVA”) resulting from adverse effects of an influenza (“flu”) vaccination she received on August 30, 2021. Petition at 1. Petitioner further alleges that the vaccine was administered within the United States, her symptoms lasted for longer than six months, and neither she, nor any other party, has received compensation in the form of an award or settlement for Petitioner’s vaccine-related injury. Petition at 1, 3. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On October 24, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Respondent has concluded that "[P]etitioner's alleged injury is consistent with SIRVA as defined by the Vaccine Injury Table." *Id.* at 4. Specifically, Respondent petitioner had no history of pain, inflammation, or dysfunction in her left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain petitioner's shoulder pain." *Id.* at 4-5. Respondent further agrees that Petitioner suffered the residual effects of her condition for more than six months. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
